SHARE TECHNOLOGY EXCHANGE 2010 • BOSTON, MA

USER EXPERIENCE:

Boston University & FDR/UPSTREAM Linux on System z...

**The right combination of reliable hardware
and software to protect the University's data.**

Gerard C. Shockley, Assistant Director, Technical Services of Boston University will detail how Boston University originally chose FDR/UPSTREAM for Windows & AIX file server backup to leverage their z/OS mainframe system resources and explain how once Linux on System z took off, Boston University found it also had exactly the right solution to protect its Linux on System z data, including most importantly the University's Oracle databases.
