FATSCOPY

Linux on z Systems Backup

FDR/UPSTREAM – Extend the reach of your mainframe resources to provide high-speed data protection and rapid file level recovery for your Linux on z Systems. UPSTREAM can protect your applications and databases, such as Oracle, DB2, and IBM NOTES Domino, and also provides disaster recovery with the Rescuer.

IAM

High-Performance Backup & Recovery

FDR and ABR – Is a suite of powerful, flexible and high-performance z/OS DASD Management tools, which provide a range of features including:

- Full volume and incremental backup
- Application backup
- Data archive/migration and space management
- DASD Management Reporting
