

If you are presently using any of these applications, they make extensive use of VSAM files...

Let IAM[®] take off 30% to 80% of your Processing Time!

IAM vs VSAM

IAM REDUCES VSAM RUN TIME BY 30 TO 80%

IAM REDUCES VSAM EXCPs BY 70 TO 95%

IAM REDUCES VSAM CPU TIME BY 40 TO 65%

CICS and Batch applications make heavy use of VSAM (KSDS) files. VSAM is a prime bottleneck to the performance of these systems. IAM, a transparent alternative to VSAM, eliminates the VSAM bottleneck by slashing I/O and CPU time. IAM's Real Time Tuning monitors I/O activity, dynamically changing the number of buffers and I/O chaining. Batch processing times are dramatically reduced.
