

FDRWEB: CREATE A NEW RMM Report

STEP 1: Use the **Create a Job** option to create a new report. The **Select** tab is where the specification of the fields and values to be used to select the records to be included in the report. To get the desired information from RMM volume records, we are selecting the Days since last read value greater than 396 days (13 months).

SELECT Days since last read (tape) greater than 396

STEP 2: Just so we will not get any undesired scratch tapes, we will exclude any Scratch tapes by specifying that information on the **Exclude** tab.

SELECT Volume status (tape) equal to SCRATCH

STEP 3: Use the Report tab to see the default fields that will be included in the report. You can add/delete any fields here if desired. The defaults (tape volser, creation date, last referenced date, volume status, etc.) are the fields we want. Finally, we would like to have the report sorted by creation date, so the **Sort** option is checked for the **Creation date** field.
